* **Consolidated Rates** include all portion amounts broken out in shaded area.

How do I determine which figures to use in calculating my Taxes?

Consult the latest Final Assessment Roll listing for your property. You will want to note the Fire District code. On the rate chart use the "Inside Village" figures if you are in the Village limits.

Use the "Town" figures if you are not in the Village limits and there are no Fire District Codes listed.

All other properties will need to find the rate line that is correct for their Fire districts
